

Chief, Intelligence Information Staff, OIR

26 November 1953

Chief, Industrial Division, OIR

Evaluation of [REDACTED] 25X1A2g  
Program.

25X1X7 1. Two separate evaluations of the [REDACTED] 25X1X7  
[REDACTED] are attached. One is from the Guided  
Missiles Branch. The other is from the Manufacturing Sector  
Branch.

2. The first expresses the general opinion (of the military  
branches) of this Division that while the program has quite  
obvious deficiencies there is a need for intelligence on Communist  
China and this program will help to fill the gaps.

3. The second is a more detailed evaluation. Reports from  
the program and OIR requirements are cited. The evaluation was  
made by one of our non-military branches and must be viewed,  
consequently, as a general economic interpretation. But despite  
this factor the evaluation appears a rather pointed and useful  
guide to your staff and other consumers. The enforcement of this  
information potential is clear. The need for improvement in the  
exploitation is equally so.
